

Please think about these questions before you rent

What product do you want to transport? (E.g. cacao, wheat, sand, clay, moisty or sticky products. Density of the product)

How does the product get on our conveyor belts? (Shovel, tipping truck/container, walking floor)

How wide is the bucket? (width of the shovel/tipping truck/container)

From what height does the product get on our system?

To which height do you wish to transport your product?

Across what distance do you wish to transport your product?

How wide can our machine be?

Do we need to deliver the machine with a smooth belt or one with chevron profile?

How many tonnes per hour do you wish to reach?

What is your rental period? (from... until...)

What is your billing adress and delivery adress? (And VAT-number)
